

Odyssey Fun Center Spring Ball League

Presented by ELITE Pro Shop, Storm Bowling and Roto Grip

You should join up this league if you fit any of these descriptions:

- If you're looking to stay sharp during the spring/summer months, or
- If you're looking to add to or replace any of the bowling balls in your bag today, or
- If you want to challenge yourself on lane patterns you don't normally bowl on with very little commitment or risk

League Details:

1. Choose to bowl one of 3 days: Tuesday's, Wednesday's or Thursday's
2. Bowl just 8 weeks at 6:00p starting April 30, May 1st or 2nd, finishing late June. *The week of May 14-15-16 we will have a scheduled night off.*
3. Wednesday league is on a standard house pattern, Tuesday and Thursday are on Challenge Patterns. Challenge pattern schedule is:
 - Hoagland Challenge 40'
 - Satan's Bounce Pattern 35'
 - Kegel Route 66 45'
 - Satan's Challenge Pattern 40'
4. Choose the package from the following pages that you'd like to participate in. Ball packages include all drilling and grip fees. Pre-pay and get your package immediately plus \$10 in Kraemer Kash at OFC!!

ELITE Pro Shop Challenge League Frequently Asked Questions

A Little Q & A: ELITE Pro Shop Challenge League - Spring Edition

There have been a couple questions raised about the ELITE Pro Shop Challenge League - Spring Edition we sent you last week and we wanted to take a moment to address those with you all so there was a better understanding and it can lead to better questions or clarification.

What does a typical league night look like?

At 5:30 stop at the front desk and see Steve who will check you in. Pay the chosen weekly fee (or skip it altogether if you pre-pay) and draw a card on the table that gives you a scoring monitor position. Once everyone is checked in we get the monitors set up and 15 minutes of practice begins. We estimate a league starting on time at 6:00p will be done by 7:30p

Why are you offering this league on Tuesday's, Wednesday's and Thursday's?

In a word: **flexibility**. We have heard from a LOT of people who have expressed interest in the program. Some are waiting to sign up, some are still thinking and yet others said they have a schedule conflict where they wished we had another option. For that reason, we're opening up THREE league options so that if a particular day works for your schedule, you can make one of these days fit it. One thing to note is the Tuesday and Thursday leagues will be Challenge Patterns on the lanes while the Wednesday league will be a standard house shot league. Pick your day and show up the first week to get started.

Do I have to pre-pay for the whole league or can I pay week-by-week as my budget allows?

We put both options on the table so you can do what your budget allows you to do. We'll leave it totally up to you and what you want to do. Last year we even had people start paying weekly and at some point into the season pay the balance and qualify to get their ball right away. Those that pre-pay not only save money over paying weekly, but they also get \$10 in Kramer Kash to use on food or beverages at Odyssey Fun Center

If I pre-pay can I get my ball right away?

Absolutely!! If you want to get your ball right away, simply pre-pay for the entire season and we'll either cut it out of our stock or get it in on the next order.

I like a challenge but are the pattern really hard where I'll be frustrated and quit?

The patterns have been chosen based on their lengths so you can learn your game and your equipment better. The different lengths make you play specific parts of the lane to make your ball go through the pins the right way. Many times, those instructions are given during announcements - if you miss them, just ask. While the patterns can be a shock, getting your feet in the right spot makes all the difference in the world. If you need help, just ask - there are plenty of people there willing to assist you get better. And, since there is no money on the line, just prizes, there is very little risk in coming out and bowling on something you normally wouldn't bowl on.

What if I can't make a week of bowling, how do I make up the games?

One simple thing to do is if you know you're going to miss a night ahead of time, show up for the other night the league is offered that week - we'll take care of transferring the record keeping. If you miss a week you can either make arrangements with Erick at Odyssey to get the pattern out for make-up before the next week or you can simply collect a free games pass at the end of the year so you can practice with your new equipment. And don't worry if you are signed up for a challenge league pattern and have to bowl a house pattern to make it work for the week. We'll keep separate stats for you either way. We want this league to have the maximum flexibility for you.

What if I don't know what ball to pick - who can help me figure that out?

Fortunately we have a set of 12 Matchmaker balls that you can try for no charge to see what rolls best for your game - we just have to make an appointment with Steve to get it done. To see a listing of the current MatchMaker balls, go to www.eliteproshop.com and click on the MATCHMAKER link

What if I don't want a bowling ball, but want to bowl in the league?

We're totally cool with that. Last year 1/3 of the people in the league chose the "Bowling Only" option. If you wish to participate, but elect to not get a bowling ball, you certainly can sign up that way. And, if you later decide you do want a ball in the middle of the season, we'll upgrade you for the difference and credit you with what you already paid. Weekly bowling-only fees are \$15

THE BOWLER'S COMPANY™

Storm Crux Prime
Storm's has pushed the envelope further from the competition once again in coverstock technology with the new Crux Prime. Wrapped around the trusty Crux core is a new cover that has been engineered to have greater "stickiness" over any other cover on the market. The result is a predictable and strong motion regardless of how oily the lanes feel the result at the pins is a different sounding "ping" when it hits the pins. Be careful though as you need oil to hold this one back from hooking too early. It is currently the TOP ball on top or the heavier volumes of oil they bowl on every week

\$289 Pre-Pay * *** Plus Tax**
\$39 if you pay weekly

Storm Physix
When you are looking for a strong asymmetrical ball to get through the front of the lane yet still have a controllable yet hard-hitting motion at the pins, the Physix is for you. While there haven't been many Physix thrown in the Sheboygan area this year, the number that are thrown on tour is a testament to how much people are missing out on this marble.

If you are looking to regain the Code Black style motion you have been craving since it was taken out of the line, shine this one a little and you have a very, very similar motion

\$289 Pre-Pay * *** Plus Tax**
\$39 if you pay weekly

* Pre-pay for Cruz Prime or Physix saves \$23 over weekly pay and you get \$10 in Kramer Kash to use on food and beverage while at Odyssey Fun Center

HP4
HOOK POTENTIAL

Roto Grip Halo Pearl

The Halo Pearl takes the proven low RG (easy spinning) core and matches it with the strongest pearl cover on the market (found on the Idol Pearl) and creates a very different motion than other balls in the line up. While the Hyper CELL Fused will create a faster change of direction and more of a "snap" look to it, the Halo pearl is quite smooth for such a strong ball. If you are looking for a step-down from your biggest ball and something after the lane transitions when you need something more predictable on increasing friction, the Halo Pearl is your ball!

\$289 Pre-Pay * *** Plus Tax**
\$39 if you pay weekly

Roto Grip Halo

The Halo utilizes the Microbite cover on a brand new core that makes it one of the strongest oil balls on the market just a notch below the recently released Crux Prime. While the Prime has more of an arcing motion, the Halo responds to friction quicker. Interestingly, you can read above how smooth the pearl version is, this one looks a bit faster and more total response to friction and changing direction on the lane. A number of youth bowlers have picked up this ball to increase their ability to handle oil. If it works for them, it will work for you

\$289 Pre-Pay * *** Plus Tax**
\$39 if you pay weekly

** Pre-pay for Halo Pearl or Halo saves \$23 over weekly pay and you get \$10 in Kramer Kash to use on food and beverage while at Odyssey Fun Center*

HP4
HOOK POTENTIAL

Roto Grip Hyper CELL Fused
The Hyper CELL Fused is a trusty cover on a very trusty core from the past. The last hybrid CELL core ball out was the Rogue CELL back in 2008—but that one was very smooth and curvy. The Fused is long and angular.

A new cover gives this one more traction on the back of the lane and makes some serious change of direction. Personally, I took my No Rules Pearl out of the bag just to put the Fused in that same spot. That's not to say I don't love my NRP, but the Fused is too exciting not to have in the bag.

\$289 Pre-Pay * *** Plus Tax**
\$39 if you pay weekly

Roto Grip Hot CELL
As good as the Storm Pitch Black's have been since introduction, the Hot CELL has redefined urethane performance. The biggest difference in my experience is not only does it hook more than others, it HITS so much harder you can hear it.

Here is what Chris Schlemmer says about it's performance: *In comparing to the other urethane balls on the market, this ball is at least 1 full arrow stronger and does not quit through the pins. In fact, this ball drives hard enough that more 9-pins were left in testing than 10-pins.*

\$289 Pre-Pay * *** Plus Tax**
\$39 if you pay weekly

* Pre-pay for Hyper CELL Fused or Hot CELL saves \$23 over weekly pay and you get \$10 in Kramer Kash to use on food and beverage while at Odyssey Fun Center

900 Global Space Time Continuum
 The Space Time Continuum™ features an all new cover concept combined with a tweak of the core found in the Continuum. The coverstock uses the base formula found on the popular Honey Badger that features enhanced polymerization of the molecular structure. This will significantly increase the overall backend motion of the ball. The core features the same shape as the core found in the Continuum but the density has been altered to yield a higher RG and lower differential. This will cause the ball to conserve more energy for the backend part of the lane.

\$289 Pre-Pay * *** Plus Tax**
\$39 if you pay weekly

900 Global Continuum
 The S82RX Hybrid Coverstock will provide a never before seen angular reaction on heavy oil in the 900 Global line. All additives have been removed from the cover. This results in a much cleaner reaction through the heads combined with an angular backend. The Ellipticon Asymmetric Core offers one of the highest intermediate differentials on the market.

Asymmetry has been pushed to the limits. This results in the strongest heavy oil backend motion 900 Global has ever produced.

\$289 Pre-Pay * *** Plus Tax**
\$39 if you pay weekly

* Pre-pay for Space Time Continuum or Continuum saves \$23 over weekly pay and you get \$10 in Kramer Kash to use on food and beverage while at Odyssey Fun Center

THE BOWLER'S COMPANY™

Storm Super SonIQ
The SonIQ I felt was a great ball for challenging conditions that was so smooth I think most bowlers felt like it didn't do much. The flatter the lane, the better it seems to roll. When you see a little too much volume of oil, it seems to go too long.

Enter the Super SonIQ that is a 3,000 grit Nano hybrid cover to give a big boost to traction and hook potential. This is a GREAT looking ball that goes through the pins significantly stronger and appeals to the eye to grab the lane sooner and change direction harder

\$269 Pre-Pay * *** Plus Tax**
\$37 if you pay weekly

Storm IQ Tour Edition
When the normal life cycle of the bowling ball is 18 months or less, and you see a ball on the market for 8 years, you know it's something special.

The ultimate "benchmark" ball on the market today is the IQ Tour Edition. It is a ball that spins up easily and yet doesn't change direction too hard so that it's out of control. Admittedly those with slower speed or faster spin rates might find this ball better than others. But that doesn't take away from it's awesomeness

\$269 Pre-Pay * *** Plus Tax**
\$37 if you pay weekly

** Pre-pay for Super SonIQ or IQ Tour saves \$27 over weekly pay and you get \$10 in Kramer Kash to use on food and beverage while at Odyssey Fun Center*

THE BOWLER'S COMPANY™

Storm Phaze 2

The Phaze 2 is one of the best balls on the market no one is paying attention to. We always watch to see what the pro's are throwing to tell us what balls roll the best and this is one that gets a LOT of play on tour. Strong, smooth, predictable and hits the pins hard—the perfect ball!

This remains one of our top selling balls over it's lifespan. People just end up realizing how good it rolls when they see someone beat the crap out of the pins with it—then they come in to get it. A really, really good bowling ball

\$269 Pre-Pay * *** Plus Tax**
\$37 if you pay weekly

Storm SonIQ

SoniQ was called by one YouTube ball review guy with TONS of followers "*maybe the most anticipated ball in Storm's history*". With the release date being pushed back a full two months after it's initial info release, I can't remember a time when so many have asked about the SonIQ.

The SonIQ is the fastest revving ball Storm has ever made. It chugs throughout the entire body of the lane and as a result is fairly smooth. This is a true benchmark pearl that I feel every serious bowler should have in their bag.

\$269 Pre-Pay * *** Plus Tax**
\$37 if you pay weekly

* Pre-pay for Phaze 2 or SonIQ saves \$27 over weekly pay and you get \$10 in Kramer Kash to use on food and beverage while at Odyssey Fun Center

HP3
HOOK POTENTIAL

Roto Grip Idol Pearl

For those who miss the Marvel Pearl reaction featuring a fast-revving core and a strong cover, the Idol Pearl will be your replacement in your bag for that classic motion.

On the outside it's a brand new cover that is the strongest pearl on the market. It has a ton of friction properties that make pin down balls be strong and smooth and pin up balls change direction "Bigly". This is a very strong ball that is easy to get down the lane, but when it changes direction—LOOK OUT!!

\$269 Pre-Pay * *** Plus Tax**
\$37 if you pay weekly

Roto Grip Idol

You can't miss when you see an Idol go down the lane with its pastel purple cover infused with Microbite that is Roto Grip's version of Nano covers.

Like the pearl this is a very easy spinning core and due to the footprint of the cover you will find it is early and smooth and handles lots and lots of oil for a symmetrical ball. Speaking of, this is the biggest ball on the market that is not asymmetrical. This is a must for tournament bowlers to have in their bags if they plan to see any amount of oil on the lanes

\$269 Pre-Pay * *** Plus Tax**
\$37 if you pay weekly

** Pre-pay for Idol Pearl or Idol saves \$27 over weekly pay and you get \$10 in Kramer Kash to use on food and beverage while at Odyssey Fun Center*

900
GLOBAL™
Performance – for **YOUR** Game.™

900 Global Eon Infinite
The S71™ Re-Loaded coverstock utilizes the same base formulation as the popular Badger. However, the molecular structure of the resin has been enhanced and optimized to increase backend motion on heavier oil patterns.

The Oloid Symmetric Core features two congruent circles merged in perpendicular planes. This design causes a meandering effect on the center of gravity thus giving the ball more length. This added length allows the core to maintain it's energy longer resulting in greater down lane hook potential.

\$269 Pre-Pay * * Plus Tax
\$37 if you pay weekly

900 Global Eon
The S82RX Pearl Coverstock will give the bowler a very clean look through the front part of the lane combined with a quick response to the friction. Perfect for medium-heavy oil.

The Oloid Symmetric Core features two congruent circles merged in perpendicular planes. This design causes a meandering effect on the center of gravity thus giving the ball more length. This added length allows the core to maintain it's energy longer resulting in greater down lane hook potential.

\$269 Pre-Pay * * Plus Tax
\$37 if you pay weekly

* Pre-pay for Eon Infinite or Eon saves \$27 over weekly pay and you get \$10 in Kramer Kash to use on food and beverage while at Odyssey Fun Center

THE BOWLER'S COMPANY™

Storm HyRoad X or Fever Pitch
The HyRoad X is the 10 year anniversary ball in celebration for the longest time on the market for a single ball. The X is a polished solid HyRoad and combines easy length and a smooth sweeping hook ideal when the lanes start to get a little dirty.

The Fever Pitch is something brand new as a hybrid urethane/reactive cover that is not as early as a pitch black, and shows a pinch more change of direction down lane. Make no mistake, it still rolls like a urethane, just different than what you're used to seeing from them.

\$239 Pre-Pay * * Plus Tax
\$34 if you pay weekly

Storm HyRoad and HyRoad Pearl
There is no ball in the history of bowling that has had a longer life cycle than the Storm HyRoad—approaching **10 years**. A ball that lasts that long, and has sold that many units, must be some amazing piece of equipment.

The HyRoad is a great transition ball that is clean enough as the lanes are drying out and yet still goes through the pins with authority. This might be the all-time favorite ball of the PBA Tour players with it's ability to work on many patterns.

\$239 Pre-Pay * * Plus Tax
\$34 if you pay weekly

* Pre-pay for HyRoad or Pitch line saves \$33 over weekly pay and you get \$10 in Kramer Kash to use on food and beverage while at Odyssey Fun Center

HP2
HOOK POTENTIAL

Roto Grip Winner Solid
From ball designer, Chris Schlemmer:

We formulated a new solid material by the name of VTC-S18. This new solid coverstock creates good traction without gripping too early and causing the ball to slow down too much. After many tests and many conversations, we decided that the ball needed to be finished to a 3000 grit level, but with different steps before that final sanding. By doing this we created a solid cover that help get the ball through the front of the lane, yet allows enough traction downlane to still change directions.

\$239 Pre-Pay * *** Plus Tax**
\$34 if you pay weekly

Roto Grip Winner

From ball designer, Chris Schlemmer:

Best compared to the Wreck-EM from last year, the new WINNER is a lot stronger than that. If you were to compare freshly drilled balls side by side, the WINNER is an arrow stronger with A LOT MORE BACKEND. In our testing the new WINNER actually played well off the Storm Marvel Pearl which is lower rg, with just a little less differential. But motion wise, it was very similar. So if you are needing that ball that plays off your Hustle that is cleaner with more backend, the WINNER is the ball

\$239 Pre-Pay * *** Plus Tax**
\$34 if you pay weekly

** Pre-pay for Winner's saves \$33 over weekly pay and you get \$10 in Kramer Kash to use on food and beverage while at Odyssey Fun Center*

900 Global White Hot Badger

The ALL NEW White Hot Badger is the symmetric compliment to the follow up to the popular Badger. The White Hot Badger offers the most skid/flip reaction within the 900 Global symmetric line.

The Lacerate core will provide easy length through the heads combined with maximum torque at the breakpoint. Expect to see a quick change of direction. This core also features a true two-piece design. Pure cover meets ferocious core!!

\$239 Pre-Pay * *** Plus Tax**
\$34 if you pay weekly

900 Global Honey Badger Claw

The Honey Badger Claw will push the limits of hook within the 700 series. The S71 cover has been converted to a solid version for more traction in oil. The Honey Badger Claw will be the most aggressive Badger to date!!

The Grapnel Asymmetric Core will provide adequate length on medium to heavy conditions. This core will retain energy longer to offset the aggressiveness of the cover!! Expect to see massive skid/flip reaction on heavier oil!

\$239 Pre-Pay * *** Plus Tax**
\$34 if you pay weekly

** Pre-pay for a Badger saves \$33 over weekly pay and you get \$10 in Kramer Kash to use on food and beverage while at Odyssey Fun Center*

900 Global Honey Badger

The ALL NEW S71 Coverstock will provide great length through the heads. The cover was blended specifically to give bowlers that skid/snap reaction everyone loves to see. The Grapnel asymmetric core features a traditional solid 2-piece core design.

This coverstock and core combination will open up medium conditions with ease.

\$239 Pre-Pay * *** Plus Tax**
\$34 if you pay weekly

900 Global Badger

The Badger is the symmetric compliment to the asymmetric Honey Badger and will rip the backend apart with ease.

The Lacerate core will provide easy length through the heads combined with head turning motion off the break-point. The S71 coverstock allows bowlers to easily open up their angles, as the lanes transition.

Badger and Honey Badger, together they create a duo no pin can survive!

\$239 Pre-Pay * *** Plus Tax**
\$34 if you pay weekly

** Pre-pay for a Badger saves \$33 over weekly pay and you get \$10 in Kramer Kash to use on food and beverage while at Odyssey Fun Center*

HP1
HOOK POTENTIAL

Roto Grip Hustle

Don't let the HP-1 designation on this line fool you, the Hustle line of balls is all performance—but it's the right performance at the right time with just the right dynamics to make this ball a must in your bag.

The **Hustle HYB** is the Hustle that handles oil the best with a stronger cover and a scratched surface to grip more through oil. The motion is never going to be snappy and always rolls smooth. This ball has enough guts to slowly allow you to move towards the middle as lanes begin to change.

The **Hustle Pearl** is a great ball to have in your bag as a step-down when you want to play the same part of the lane but your other equipment is hooking too early. This ball is clean through the first 30 feet and a smooth motion off the back of the lane. While it's not a snap motion, it will look like this one changes direction the most if you compare all 3

The **Hustle Ink** is easily the best Hustle ball ever made and is a staple in tournament bowlers arsenals. It is exactly the right combination of easy to get through the front of the lane, but early enough mid-lane read to not miss the hook spot and smooth enough that it's not "whippy" on the pattern. If there ever was a lighter oil benchmark ball, this is it

\$199 Pre-Pay * *** Plus Tax**
\$27 if you pay weekly

** Pre-pay for Hustle's saves \$17 over weekly pay and you get \$10 in Kramer Kash to use on food and beverage while at Odyssey Fun Center*

THE BOWLER'S COMPANY™

Storm Match Up

Sometimes having a value-performance ball is just enough when you have lanes that either require you to keep your target in front of you or hook a bunch and you need something that is tame to blend it out.

The **Match Up Black Pearl** acts more like a solid Matchup than a pearl with the scuffed cover. While this ball won't handle oil like a Thunder line ball, it will be a solid choice for the beginner or someone looking for more performance than a Hustle.

The **Match Up Hybrid** is maybe one of the prettiest bowling ball on the market. It goes longer than the Match Up Black Pearl, but has more change of direction down lane. This ball is actually pretty good at staying box shiny as it comes or scratched a little to give it more traction when there is more volume on the lanes.

The **Match Up Pearl** is easily the longest and most angular of all the Match Up's. The all-pearl cover skids easily to the spot and the moderate core doesn't lose energy getting to the spot. That means once it leaves the pattern and sees friction, it turns quickly. If you remember the Roto Grip Uproar that was a killer drier lane ball, this replicates it almost perfectly.

\$199 Pre-Pay * *** Plus Tax**
\$27 if you pay weekly

** Pre-pay for Match Up's saves \$17 over weekly pay and you get \$10 in Kramer Kash to use on food and beverage while at Odyssey Fun Center*

900 Global Boost

The classic S43 Pearl Coverstock creates length downlane, perfect for drier oil conditions. The Launch Symmetric core enables a sharp turn and pop off the spot at the breakpoint. Use the Boost on drier/lower volume conditions!

\$199 Pre-Pay * *** Plus Tax**
\$27 if you pay weekly

** Pre-pay for Boost saves \$17 over weekly pay and you get \$10 in Kramer Kash to use on food and beverage while at Odyssey Fun Center*
